HTML/CSS/JS   (Web Applications)   5 years
C/C++/C#   (Videogames)   4 years
Python   (Machine/Deep Learning) 5 years
Git and GitHub (Collaboration)   3 years
SQL/MongoDB   (Data Analysis/Business) 2 years
Linux   (Open source dev)   4 years
Jetson/RBPi/Arduino (Quick electronics) 6 years

LANGUAGES

Spanish — Native
English — Professional
French — Conversational (B2)

EDUCATION

Engineering Physics

Engineering Faculty of the Autonomous University of Yucatan (UADY).
August 2017 - June 2022
Final note: 95.08 / 100 - Graduated by thesis

WORK EXPERIENCE

SAP ABAP, SAP FICO, SAP Ariba and Ariba CIG Consultant

WAYAKNA S.A. de C.V.
January 2021 - Today
Complete development of transaction codes, enhancement of already implemented programs, finance, controlling and material management support, functional testing of Ariba Network, Buyer and Supplier (P2P/SCC modules), monitoring and upgrading of support packages of Ariba CIG.

Takeda Pharmaceutical Company Limited - ERP External Consultant

RECOGNITIONS, DISTINCTIONS AND AWARDS

Mexico's Team Leader Award

Huawei Seeds for the Future 2022 - October 22nd, 2022
Team Leader representing Mexico in the program Huawei Seeds for the Future 2022 being part of the team Brave Blinders

Seeds for the Future 2022

Huawei Latinoamerica - October, 2022
Learning technologies like 5G, Artificial Intelligence, Cloud Computing and Digital Power from the hand of Huawei experts and be able to participate on Tech4Good

Yucatan State Youth Award on Technology Innovation

Social Development Secretariat of Yucatan - August 9th, 2022
Implementation of an autonomous vehicle for the monitoring and risks reduction of greenhouses

NASA Hackaton winner: "Best Use of Data".

Hackaton NASA Space Apps CDMX October 3rd and 4th, 2020
Usage of astronomic data to make known scientific facts in a friendly interface.

CANSAT contests

University Space Program UNAM
National finalist 2019
Participant - Pan-American 2020
Implementing circuits and sensors, a low-cost satellite capable to measure meteorological data was created.

Santander Scolarship - BEDU - Disruptive Innovation: Data Analysis

October 13th, 2020
Scholarship to learn Data Analysis from analysts experts.

Groundwater analyser device

2nd place. Contest of Fluid Mechanics prototypes - UADY
Noviember 30th, 2019
Device capable to detect groundwater pollution parameters.

Water rocket capable to reach an altitude of 150 meters

Genesis Mission - EVA01
November 30th, 2019
Software and hardware development for the parachute deployment and data transmission stages.

COURSES AND CERTIFICATIONS

Innovation Path Program

Tecnológico de Monterrey - October 17th, 2022

SAP Development Academy

Logali - September 24th, 2021

The complete Javascript Course 2020: Build Real Projects!

Udemy - September 26th, 2020

Learn how to create an RPG video game in Unity 2019 from scratch

Udemy - Septiembre 15th, 2020

The Web Developer Bootcamp

Udemy - August 28th, 2020

Machine Learning

Stanford University Online - Oct 16th, 2019

Coding with Arduino

StudioAV/DEVStore - October 21st, 2018
